

IMPLANT
Training Academy

Enhancing Excellence In Implant Dentistry

Implant Training Academy is a carefully structured educational experience designed to empower clinicians with the knowledge and confidence to seamlessly integrate implant dentistry into their practices. This exclusive program fosters collaboration between specialists and their referral network, ensuring optimal patient outcomes through comprehensive diagnosis, treatment planning, and advanced surgical techniques.

Day 1 – Friday, February 5th, 2027

For Doctors + Up To 3 Team Members per doctor

Elevating treatment planning and team synergy

- Key components for a successful practice
- Cultivating a positive culture and cohesive team
- Optimizing intraoffice workflows and scheduling for success
- Implementing proven marketing strategies
- Discovering the hidden implant patient
- Exploring digital workflows from single-tooth to full-arch restorations
- Addressing the challenges of congenitally missing incisors
- Utilizing digital smile design and photogrammetry

Day 2 – Saturday, April 30th, 2027 *For Doctors*

Practical case execution and patient journey

- Live case discussions with interactive diagnosis & treatment planning
- Guided approach to case presentation and patient communication
- Enhancing case acceptance through clinical and financial transparency
- Team training and best practices for interdisciplinary coordination

Presented by:

Dr. Patrick Lillis

Dr. Lillis is a digital dentistry and implant expert who has practiced in Leawood, Kansas for over 20 years. Dr. Lillis has received specialized training in tackling complex dental cases, working alongside leaders in implant and cosmetic dentistry in the Midwest. He regularly speaks at study clubs and national peer-reviewed meetings and performs advanced procedures through patient and doctor referrals in his practice. His advanced knowledge of implant restorations and digital workflow has revolutionized his office to provide the most cutting-edge, premier cosmetic dentistry.

A certificate of completion will be awarded to attendees at the conclusion of this session.

Hosted by: Somi Kim, DMD, MD Oral and maxillofacial Surgeon

Dr. Kim is a board-certified Oral and Maxillofacial Surgeon, a Diplomate of the ABOMS, a Fellow of the AAOMS. Dr. Kim practices a full scope of Oral and Maxillofacial Surgery: dentoalveolar surgery including dental implants, All-On-X (AOX) procedures, bone grafting, wisdom teeth, procedures that are required for orthodontics, pathology, and facial trauma.

Dr. Kim received her DMD and MD degrees from Harvard Dental and Medical School. She completed residency at Massachusetts General Hospital. She served as a faculty member and associate program director at MGH before moving into private practice. Dr. Kim has 10+ years of experience in Oral and Maxillofacial Surgery, has performed over 3,000 arches of AOX procedures, and has placed more than 15,000 implants. She has written numerous book chapters and papers on various topics in Oral and Maxillofacial Surgery. Dr. Kim has expertise and presented nationally on advanced techniques such as pterygoid implants. She has received numerous academic and clinical recognitions including Top Dentist by Boston Magazine, the Harvard University Presidential Scholarship, and the Howard Hughes Medical Institute Research Training Fellowship.
